WLTP

The Worldwide Harmonized Light-Duty Vehicle Test Procedure (WLTP) is designed to provide a standardised measurement and enables the consumer to make reliable comparisons between vehicles in terms of energy (fuel and/or electricity) consumption, emissions, and electric vehicle range. However, it should be noted that the results of this test may not accurately reflect the actual fuel consumption, emissions, or range that a driver might experience in the real world. Actual results may vary depending on various factors such as driving style, road conditions, temperature, weather, vehicle load, and maintenance. Therefore, the WLTP results should be considered as an indicator of the vehicle's performance and not as a guarantee of the actual energy consumption, emissions, or range that a driver will experience in real-world driving conditions, or for making a vehicle-to-vehicle comparison. All WLTP test values are provided in accordance with New Zealand Land Transport Rule: Vehicle Efficiency and Emissions Data 2022.
