

ŠKODA CYCLING COLLECTION 2020

ŠKODA
SIMPLY CLEVER

DEAR CYCLING FRIENDS,

Bicycles inherently belong to the ŠKODA brand. Whether by referring to the historical origins of the brand or by sponsoring major cycling races such as the Tour de France and La Vuelta.

We proudly introduce our latest ŠKODA Cycling Collection 2019/20, whose design is marked with signature ŠKODA Crystalline elements. The collection comprises 16 models, ranging from Road Bikes, Mountain Bikes, Children's Bikes to City and E-Bikes.

The two new E-Mountain Bikes, the EMTB FULL and sister model EMTB, expand the range of ŠKODA E-Bikes and make the ride even easier. Pay attention to the new chapter Last mile mobility, we are pleased to introduce the new ŠKODA Scooter concept.

We believe that riding ŠKODA bikes and scooter will be a pleasure for you.

Enjoy your ride!

DOES IT MATTER WHICH BIKE FRAME SIZE I CHOOSE?

Indeed, it does. A correctly fitting bike will help you to go further for longer. Choosing the right sized bike depends on the type of the bike, your height, the inside leg measurement and your riding style. But it is not complicated as it sounds.

HOW TO CHOOSE CORRECT SIZE OF THE BICYCLE

The most important criteria that determines the size of the bike you need is your height. If you find that you're between sizes or you're unsure of which of two frame sizes would suit you best then other factors that can be considered is your reach.

The reach will affect your riding position quite significantly. You should not feel sitting too straight with your arms bend too much, neither leaning forward trying to grasp the handlebar.

If your sitting height is bigger than average, then the larger of the two frame sizes is recommended and vice versa.
